

PRE-TREATMENT

You are not a good candidate if:

Have previous Permanent Makeup

Pregnant or nursing

Diabetic

Undergoing Chemotherapy (consult your doctor)

Viral infections and/or diseases

Epilepsy

Pacemaker or major heart problems

Organ transplant

Skin irritations or Psoriasis near the treated area (rashes, sunburn, acne, etc.)

Sick (cold, flu, etc.)

Botox in the past 2 weeks

What NOT to do before your procedure

Do not work out the day of the procedure.

Do not tan or have sunburned face.

Do not take Aspirin, Niacin, Vitamin E, Fish Oil or IBUprofen 24 hours before procedure.

No alcohol or caffeine 2 days before the procedure.

No waxing, tweezing, or tinting 3 days before the procedure.

No Electrolysis 5 days before the procedure. (Do not resume any method of hair removal for at least two weeks.)

No Eyelash tinting or curling 48 hours before, or two weeks after the procedure. Do not wear eyelash extensions, or eyelash strips 1 week prior or during the day of eyeliner procedure. Stop using Latisse 2 weeks before your procedure.

Do not wear contact lenses during or immediately following the eyeliner procedure.

Remember to bring your glasses. You may resume wearing your contact lenses as soon as your eyes return to their pre-tattooed condition.

*Important Note: **Do NOT discontinue any medications that are prescribed by a physician or which are necessary for your health!**

If you are pregnant, you must have a signed release from your doctor (most doctors will approve of this treatment since microblading only deals with the superficial skin layers.)

Avoid alcohol 24 hours prior to the procedure to prevent bleeding.

If you have a condition that requires you to take antibiotics before a dental visit, you must check with your doctor to determine if antibiotics are needed for permanent cosmetics.

Hair removal may be done prior to your procedure (e.g., tweezing, waxing, etc.). Permanent hair removal should not be done five days before or after the procedure.

Botox should be given 3 weeks prior or 3 weeks after this procedure.

Skin treatments such as Retin-A that thin the skin in the procedure area must be discontinued for at least 30 days prior to the procedure. Accutane users must be off Accutane for at least one year. Check with your dermatologist about specific medications.

Procedures cannot be performed over fresh sunburns, including those caused by tanning beds. You must wait until the burn heals.

THERE ARE EXCEPTIONS TO THESE RULES, PLEASE CONSULT WITH ME IF YOU HAVE ANY QUESTIONS OR CONCERNS.
