**Thank you so much for picking Kiss Kreations for your amazing new eyebrows! We're really happy you chose us to help make your eyebrows look fantastic. Now that you have your new look, we want to make sure you take good care of it.**

Please follow these instructions for at least 7 days after the procedure to improve and prolong the results of your new brows.

If you don't follow these instructions, it can greatly affect your microshading results.

### **Aftercare Instructions:**

- Avoid getting anything on the brows, including water, except for cleansing as directed. You may blot for the first few hours with sterile gauze to remove any excess fluids, if necessary.
- No exercise for 7 days. After 7 days - when exercising, wear a sweatband to avoid sweat on the brow area.
- Do not expose the treated area to direct sunlight. After completely healed (30 days), use sunscreen to avoid fading from the sun.
- Eyebrows will scab or become slightly dry following the treatment. If they itch, DO NO SCRATCH them.
- If your eyebrows get wet during the healing process, pat them dry with a towel, DO NOT RUB.
- Avoid using daily skincare products directly on the eyebrows.
- If you are due to give blood after the procedure, please inform your nurse about the microshading treatment you have had as this might alter the results.
- Chemical peels, or any other medical procedure should only be done once the healing process is complete; please take this into consideration if you're scheduling a touch-up as they cannot be done 6 weeks prior to microshading.
- No makeup should be applied directly on the brows during the healing process (30 days).
